1 Quandl

Quandl uses a very straightforward API to make its free and premium data available. See docu-
mentation for more details.

```
[1]: import quandl
     import matplotlib.pyplot as plt
     plt.style.use('fivethirtyeight')
     %matplotlib inline
     oil = quandl.get('EIA/PET_RWTC_D').squeeze()
     oil.plot(lw=2, title='WTI Crude Oil Price');
```
